

Wania Saleem

Software Developer

waniasaleem12@gmail.com | Karachi, Pakistan | waniasaleem.vercel.app | github.com/wnitau

ABOUT ME

Computer Science student and software developer from Karachi who enjoys building web applications and turning ideas into useful digital products. I combine software development, user experience and problem solving with a focus on clean code and real-world impact. My approach: *show what you've built, not just what you know.*

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Federal Urdu University of Arts, Science & Technology, Karachi, Pakistan | Currently pursuing | **CGPA: 3.78 / 4.00**

PROJECTS

University Portal | Frontend | Live demo

Multi-page responsive university website bringing admissions, programs, courses, fees, faculty, news, and student and faculty dashboards into one portal.

- Dedicated sections for academic information and university services
- Student and faculty dashboard interfaces
- Responsive layouts, interactive navigation and theme support

Tech: [HTML](#), [CSS](#), [JavaScript](#), [Vercel](#) | [Live](#) | [GitHub](#)

Velora Shop | E-commerce Frontend

Multi-page online shopping experience with product browsing and details, cart, wishlist, customer account, vendor and contact pages.

- Product catalogue and product detail views
- Cart, wishlist, sign in and sign up interfaces

Tech: [HTML](#), [CSS](#), [JavaScript](#) | [Live](#) | [GitHub](#)

Personalized Drug Reaction Predictor | AI / Predictive Analytics | In progress

AI prediction agent exploring personalized prediction of drug reactions, developed in the Wania AI Lab repository.

- Developing the prediction agent and iterating through AI and predictive analytics experiments

Tech: [Python](#), [Jupyter Notebook](#) | [GitHub](#)

Wantrix.dev | SaaS Marketplace & Developer Community | In development

Platform where students and indie developers showcase and share SaaS products, with a social feed, AI guidance and a marketplace earning revenue via commissions.

- SaaS marketplace, developer profiles with portfolio showcase, social community feed, project discovery

Tech: [Next.js](#), [Node.js](#), [MongoDB](#), [AI APIs](#), [Cloud Hosting](#)

Printing Shop Management System | Database Design & Backend Logic | Completed

Comprehensive database covering customers, materials, orders, employees, machines, suppliers, payments and shop details with full relational integrity.

- ERD creation, normalization, primary and foreign key design
- Stored procedure: auto-generates monthly sales reports per customer
- Trigger: automatically updates stock levels when a new order is placed

Tech: [MySQL](#), [Oracle](#)

Course & Video Finder | Frontend | Completed

Curated website of focused courses and video resources arranged as a structured learning journey for students who struggle to find quality material.

- Built to solve the real problem of overwhelming, unfocused course content

Tech: HTML, CSS, JavaScript

Drawing App | Python Desktop Application | Completed

Desktop drawing application with a rich set of creative tools.

- Color palette, adjustable brush size, undo/redo, save and delete

Tech: Python, Tkinter

Personal Portfolio Website | Frontend | Completed

Responsive multi-page developer portfolio showcasing projects, skills and professional profile.

Tech: HTML, CSS, JavaScript | waniasaleem.vercel.app
